

Covid-19 vaccines: What are the world's best doctors saying?

Do you really believe that every one of these highly qualified experts, each with many years' experience in their respective fields, is a 'conspiracy theorist' spreading 'misinformation'?

Dr Tess Lawrie (MBBCh, PhD) Director, Evidence-based Medicine Consultancy Ltd

'It is now apparent that these products in the bloodstream are toxic to humans. An immediate halt to the vaccination programme is required whilst a full and independent safety analysis is undertaken to investigate the full extent of the harms, which the UK Yellow Card data suggest include thromboembolism, multisystem inflammatory disease, immune suppression, autoimmunity and anaphylaxis, as well as Antibody Dependent Enhancement (ADE). ...

'The MHRA now has more than enough evidence on the Yellow Card system to declare the COVID-19 vaccines unsafe for use in humans. Preparation should be made to scale up humanitarian efforts to assist those harmed by the COVID-19 vaccines and to anticipate and ameliorate medium to longer term effects.'

'This is unprecedented in the history of any medicine, to have so many deaths in such a short space of time.'

Dr Peter McCullough MD, MPH, cardiologist & epidemiologist, Baylor University Medical Center, Dallas, Texas

'The vaccine, in a sense it's become a menace. It's been a propagandised, socially weaponised menace and it's terrible. We find out the vaccines don't work and they're not safe. What I would advise is an immediate halt to the vaccine programme.'

Dr Sucharit Bhakdi – one of the most cited research scientists in German history, former Professor at the Johannes Gutenberg University in Mainz and Head of the Institute for Medical Microbiology and Hygiene, with expertise in vaccinations.

'It is our duty to aggressively inform people about the dangers that they are subjecting themselves and their loved ones to by this 'vaccination'. Gene-based vaccines are an absolute danger to mankind'.

On 'asymptomatic spread' of Coronavirus: 'It is complete nonsense, it's never been shown, it's a claim that has been spread as a fact, and this I consider criminal'.

Charles Hoffe MD

'These little packages of messenger RNA go into your bloodstream. Your body then gets to work manufacturing trillions and trillions of covid spike proteins. These cells that line your blood vessels that are supposed to be smooth so that your blood flows smoothly, now have these little spiky bits sticking out so it is absolutely inevitable that blood clots will form.'

Sir Christopher Chope MP – 2nd reading of the Covid-19 Vaccine Damage Bill in the House of Commons, September 2021

‘Essentially what the Yellow Card scheme shows... that there have been 1632 reports of deaths having taken place shortly after vaccination. There’s a lot more damage being done to our citizens as a result of Covid-19 vaccinations than as a result of any other vaccination programme in history.

Our hospitals have got a large number of in-patients who are only there because those patients took the vaccine and it’s causing a lot of angst for consultants across the country. We know that there is causation between vaccinations and damage caused by those vaccines yet the government in a lot of its literature seems to be denying it.’

Dr Thomas Binder MD

‘An endemic of a seasonal beta corona cold virus, has been inflated into a pandemic of a perennial killer virus... fought with serial unnecessary, ineffective, unsafe experimental mRNA and DNA injections.’

> **Search ‘Thomas Binder’ at rumble.com**

Dr Marcus De Brun GP, microbiologist

‘Speaking as a qualified Microbiologist, I would NOT administer an mRNA vaccine to a healthy animal, never mind a healthy human being.’

‘I would not administer the novel gene therapy to my children under any circumstances.’

> **See tinyurl.com/tnfcfv2**

Dr Roger Hodkinson, pathologist and expert in virology

‘Believe nothing you are being told. It’s all been a pack of lies from start to finish – pure propaganda. This is nothing more than a bad seasonal flu, with a slightly increased risk for older people with comorbidities. This is a pandemic of fear.’

> **Search ‘Roger Hodkinson’ at rumble.com**

Dr Kary Mullis, Nobel prize winner and inventor of the PCR test

‘The PCR test was never designed to tell you if you are sick ... Anyone can test positive for practically anything with a PCR test, if you run it long enough. ... With PCR, if you do it well, you can find almost anything in anybody.’
